

Silhouette Cameo™

The Silhouette CAMEO™ is a digital cutting machine for personal use.

Like a home printer, it plugs into your PC or Mac® with a simple USB cable. However, instead of printing it uses a small blade to cut paper, cardstock, vinyl, fabric, rhinestone templates, magnet, tattoo paper and more up to 12" wide and 10 feet long.

With the machine connected to your computer, you'll get access to all of the true type fonts on your computer plus thousands of designs without the need of cartridges.

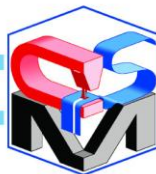

You will be able to create your own designs with the free **included** software called Silhouette Studio.

The machine boasts a quiet motor and the ability to register and cut printed materials.
